

NEWS OF THE WEEK FROM MAYNE ISLAND

School Report and Promotions. Photograph School-Closing Celebration Taken

(Review Correspondent.)
MAYNE ISLAND, July 10.—On Wednesday last Mr. Hall, Mr. Stewart and Miss Maude went to Ganges to attend a dance given by Miss Doris Taylor.

Miss Tolly Robson is now home for the holidays after passing her examinations successfully.

At the school break-up, Mr. Shaw took a speaking photograph of all present. Mrs. Bennett as the oldest resident of Mayne Island was seated in the centre; it's a perfect likeness to the dear old resident. The school report was as follows:

Promoted to grade 8—Louise Newnham, Willie Bennett.

Promoted to grade 7—Annie Sumi, Yuzo Aachi, Jessie Robson, Leslie Garrick.

Promoted to grade 6—Elliott Robson, Phoebe Newnham.

Promoted to grade 4b—Fred Newnham, Jimmie Sumi, Annie Tinkley, Maggie Aachi, Toshi Mima Minkie.

Promoted to grade 4a—Gertie Bennett, Naka Adachi, Mosoa Adachi, Ai Kosumi.

Promoted to grade 1—Roshie Kadoyama, Shizu Nagata, Ischi Sellers, Nowell Sellers, Archie Seacon.

The following were presented with Rolls of Honor: Proficiency, John Newnham; deportment, Willie Bennett; regularity and punctuality, Louise Newnham. Prizes awarded to each class for neat exercise books were won by the following: Kathleen Garrick, Louise Newnham, Annie Sumi, Elliott Robson, Naka Adachi. Saturday evening a most enjoyable dance was held at the T. Bennett's in their large hall. Quite a number gathered, and dance music was played. Mrs. T. Bennett gave one of the old fashioned dances and delighted the audience.

Thursday the only star boat crossing the gulf under sail was the "Milky Way III," owned by Major Buck and Mr. Harold Payne.

Mr. and Mrs. Bodkin anchored in the Pass over night in their yacht, "4 Winds."

Friday Mrs. Fletcher, Mrs. Ward, Mrs. Shilling took passage on the "Princess" for Victoria.

Major Buck, Mr. H. Payne and Reg. stayed the night at Point Comfort.

Mr. and Mrs. Shaw had quite a rough crossing in the V.V. from Vancouver their small son being with them.

Mr. Shaw has just sold "The Dorothy" which was anchored in the Pass a short time ago.

Capt. Den Roach was over Friday to meet guests staying in one of his summer cottages.

There was quite a joke at Mayne Island this week. A boat was so close to the shore that it was called for it, the man who had sold it being away his wife seated in the back seat, gathered and the boat was launched and taken to Ganges; there the owner on examining found it was not quite finished and had no bottom boards. Happily he had not filled it with his passengers.

Sunday the Gulf of Georgia was alive with yachting craft crossing to English Bay to take part in the races coming off this week. It was a very pretty sight from large yachts and cruisers to star boats and dinghies.

Sunday morning, July 1, the Vlear took service at Point Washington in the evening at St. Mary's. Here there was a fairly good congregation.

Monday about 30 Mayne Islanders came getting passage in the Vlear's boat others leaving in Mr. George's boat spent a very happy day at the sports held in Mr. Enke's field. It was a cool day not too much sun and yet enough.

Mrs. Emery, Earl Howard, Annie Alken, Margaret Payne and Laura Alken were those from Mayne who carried off prizes.

Tuesday Miss McConnell left for Victoria to undertake the correction of the French matriculation exam papers.

Guests at Grand View Lodge last week were Mr. J. Williams, Mr. Hayard, Mr. H. Lewis, Mr. Hawkins.

Guest Den Roach was a visitor at Point Comfort Tuesday.

(Continued on page two)

Grade 3.—Deportment, Muriel Holdridge; regularity and punctuality, Jim Brewster; proficiency, Alma McMoyl.

Grade 4.—Deportment, Mary Brennan; punctuality and regularity, Joseph Brewster; proficiency, Wilma Crichton.

"MOTOR PRINCESS" TO

CALL AT SAANICHTON

On Friday, Saturday and Sunday, July 13, 14 and 15, the automobile ferry Motor Princess, it is announced at the office of the B. C. Coast Steamship Service, will again make Steamship her Vancouver Island port of landing owing to the extreme low tides at Sidney, which is the usual terminal.

On Monday, July 16, the Motor Princess will resume her calls at Sidney.

The temporary call at Saanichton is pointed out, will be to the advantage of motorists, as the detour from Sidney caused by the paving work, will be avoided.

Prior to the inauguration of the Bellingham ferry service in May the Dominion Department of Public Works carried out considerable dredging with the dredge Ajax at Sidney. With an exceptionally long run out of the tide, however, it is considered unsafe to berth the Motor Princess at Sidney, and under these circumstances the wharf at Saanichton is utilized.

The Federal Department of Public Works is being urged to carry on further dredging operations at Sidney to provide a sufficient depth of water for the docking of the motor ferry at all stages of the tide.

The Port Angeles draws 3 feet more water than the Motor Princess and makes the landing alright.

PERSONAL AND LOCAL NEWS FROM GALIANO

The Recent Agitation for More Telephones on the Island Bears Fruit

(Review Correspondent)

GALIANO, July 10.—The Dominion Day sports, held here in the valley last week, in Mr. M. Enke's pasture next to the creek, were very successful, largely due to the field giving the spectators plenty of room to view the different events and to the competitors having firm grass for the foot races and other events. The program decided on by the committee in charge, of which Mr. G. Georgeson was the leading spirit, was a varied one, which held the attention of the spectators and competitors alike for the three hours or more that the events lasted. Well over 100 people from other islands as well as from here were present and thoroughly enjoyed themselves. Throughout the afternoon boiling water, cakes, fruits, smokes and ice creams could be obtained on the grounds and were much appreciated by those present. In the evening a successful and very well attended dance was held at the school; the music was kindly supplied by Messrs D. A. New, J. Burrill and G. Georgeson; the refreshments were well catered for by the Galiano ladies; mention must also be made of Mr. Georgeson's motor car which was used by him to bring visitors from other islands, who landed at his bay to the dance, as also to the sports in the earlier part of the day.

A number of Victoria scoutmasters came to Galiano on Saturday on their camping ground on the Newnham property, where they expect this week to be joined by most of the other B. C. scoutmasters who will augment the number in the camp to about 30.

Mr. J. C. Brown, who was here recently for a fortnight stay, has left for Calgary.

Capt. W. Gilmour is back on the Island after his trip to Alaska, he expects to stay here the remainder of the summer.

The two wet days last week caught some of our farmers with hay still out, however, the rain was not heavy enough or over a long enough period to spoil it.

Mr. and Mrs. J. E. Page and children returned to Victoria last week after a visit to Mr. and Mrs. A. Cayer.

Mrs. Bow, of North Vancouver, and some friends have rented the Cain house from Mr. M. Enke for July.

Mr. Templeton the publisher and editor of the well-known magazine the "Square" and his family who rented one of Mr. I. Denroche's summer cottages on Gossip Island have returned to Vancouver. The cottage they vacated is already again occupied by summer visitors.

Mr. Denroche's other cottage will we understand, be completed towards the end of this week, when no doubt, he will have little difficulty in finding tenants for it.

Mrs. A. Cayer and Mrs. Radford both made a short visit to Victoria last week.

The Dibola Logging Co. got their first logs into the water last week. Their method of hauling the logs to the water over a track of greased poles, which makes the hauling much easier than over an ordinary skid-way, is causing considerable interest.

Miss M. Rne, of North Vancouver, one of our many recent school principals, is at present here on a visit to Mrs. V. Zala.

Mr. E. Munroe is back home after an enjoyable week's visit to Mr. and Mrs. Egan, of Montague Harbour.

Mrs. New returned here from Merritt at the end of the school term and after enjoying a brief re-union with her family, left again for Vancouver.

Next Sunday being the third in the month, Mr. Cecil Abbott will again visit us to hold Evensong in the school at 2.30 p.m.

Mr. and Mrs. Murcheson are at present enjoying a visit from his sister, Mrs. Gow, and her daughter.

The recent agitation for more telephones on the island has been productive of quick results as Mr. Harford's house and Mr. York's store have already been linked up with the system.

Mr. and Mrs. C. O. Lewis are back again after their stay in Vancouver.

WEEKLY NEWS NOTES FROM GANGES HARBOR

Formby House School Hold Annual Sports Meet—Many Exciting Events

(Review Correspondent.)

GANGES, July 10.—Formby House School held their annual sports on Saturday, July 7. In spite of the threatening weather a number of friends and parents were present to encourage the boys. The events were well contested and great interest was aroused by the senior high jump which resulted in a tie between H. Caldwell and L. Jenkins at 4 ft. 5 ins. The half mile also produced a splendid race being won by a short yard by H. Caldwell, C. Cooper running second. At conclusion the prizes were presented by Mrs. Pope of Metehosin. Following is list of events: Half mile—1. H. Caldwell; 2. C. Cooper. Quarter mile—1. H. Caldwell; 2. C. Cooper. Hundred yards—1. H. Caldwell; 2. L. Jenkins. High jump, senior—T. P. H. Caldwell and L. Jenkins; 2. P. Brine. Long jump—Jack Smart. Throwing cricket ball—1. H. Caldwell; 2. R. Sidaway. Frog race—1. G. Mawby; 2. H. Caldwell. Junior high jump—1. Cyril Cooper; 2. R. Sidaway. Obstacle race—1. L. Jenkins; 2. G. Mawby. Egg and spoon—1. L. Jenkins. Sack race—1. G. Mawby; 2. P. Brine. Consolation race—B. Campbell.

The school owe their hearty thanks to the following prize donors: Mrs. Smart, Mr. Sidaway, Mr. Cooper, Mrs. Johnson, Mr. Caldwell, Miss Frampton, Mr. Ian Thompson, Mr. Percy Fletcher and Mr. Bullock (special prize for senior high jump).

The guests at Harbour House were: Mrs. Geo. Betts Barrodale of Hollywood, Calif., Misses Theodora and Pamela Farquhar and Mrs. Farquhar of Vancouver, Mrs. A. Walters and Miss M. Walters, Miss M. McKillican, Mr. Norman Scott and son of Victoria, A. Roberts of Vancouver, Mr. and Mrs. McGuffie, Nanaimo, and Mr. and Mrs. Plumptre and son of Nanaimo, Dr. Frank, Mrs. Humphreys, Miss Burt-Smith, Miss E. Wright, Capt. and Mrs. Pitt, Capt. Mitchell, Masters Noel and Dick de Millie, Mr. Fletcher, Mr. Farley, Mr. Penny, Mr. and Mrs. Layton and son.

O. J. Garuer & Sons shipped a boom of cedar poles to Ladysmith last Thursday by the "New Era."

Capt. W. T. Cottisford being in charge.

Dr. Alan Beech, M.D., arrived at Ganges last Saturday to visit his brother, P. Beech.

Mr. H. Hood, of Fletcher Bros., of Vancouver, spent a few days this week at Ganges. While here he made a couple of water colors that were very nice and he thinks there are lots of pretty scenes here to be painted.

Capt. Oliver with the "Thomas Crosby" visited Ganges and church services on Sunday.

Miss Doris Alkens returned home from Winkler on Monday after several months' visit with Major and Mrs. Turner.

Mr. Percy Fletcher, of Victoria, spent the week at Formby House, with Mr. and Mrs. Oxenham.

Dr. Frank, Dominion Herd Tester, is a guest at Harbour House.

Mr. Spozelle, R.O.P. man, is at Ganges and vicinity.

Mr. Wiltshire, R.O.P., is on leave and expects to be married soon and we hear he will be assigned to the Gulf Islands district.

Miss Cartwright, of Victoria, is the guest of Mrs. Royal, Ganges.

Miss Hilling, of Vancouver, is visiting Mrs. Perkins at Fruitvale.

Capt. Mitchell returned last Tuesday from a short visit to Winkler where he was the guest of Major and Mrs. Turner.

Mrs. Lynes and daughter, of Vancouver, are the guests of Mr. and Mrs. Jack James.

Mr. Brown, of North Salt Spring returned on Tuesday.

Last Tuesday among those going to Victoria were: Mr. Westerner, Mr. and Mrs. Fletcher of Ganges, Miss R. Holt, Mr. C. C. Castle and Miss Ina Castle.

The Island Princess will leave Victoria at 8.30 Wednesday morning on her excursion trip around the Islands and will call at the Sidney wharf at 9.00 a.m. (new time), also at Ganges Harbour.

It is hoped that the residents will make a worth while visit to the Island Princess to call.

PUBLICITY BUREAU SENDS CHEQUE

The Arch and drive-way which will form the entrance to Vancouver Island is under construction. The concrete foundations are being built. The following letter has been received by the secretary of the Board of Trade:

Victoria, B.C., July 9, 1923

W. H. Dawes, Esq., Secy., Sidney Board of Trade, Sidney, V. I.

Dear Mr. Dawes:

Your very kind letter of the 29th ultimo, with regard to the erection of a covered driveway and entrance arch at the Sidney Ferry Wharf, was presented to the Board of Directors of this Bureau at their meeting which was held on Friday.

I have been directed to congratulate the Sidney Board of Trade on its initiative in providing this proposed improvement at the wharf, and it is with personal pleasure that I am enclosing herewith our cheque for \$50 as the contribution of this Bureau towards this work.

Yours very truly,
GEORGE I. WARREN,
Commissioner

Further funds are needed. Cheques can be forwarded to the secretary.

WEEKLY NEWS BUDGET FROM JAMES ISLAND

Sports Postponed Till July 14 Owing to the Inclemency of the Weather

(Review Correspondent.)

JAMES ISLAND, July 10.—Congratulations to Hester Richards, who has received a diploma from the Normal school; to Lillian Martin, who passed at the high school, Victoria; Ruth Richards and John Lyons, who were recommended.

Miss Hester Richards is now at tending the summer school for teachers, in Victoria.

Mrs. I. Dixon and Edna returned to the Island last Tuesday, 3rd, after spending a week at Gabriola Island and Nanaimo, where they attended the wedding of Miss Charlotte Brown, Nanaimo and Mr. John Thomas, of Gabriola Island. The wedding took place at St. Paul's church, Nanaimo.

Miss Alice Corfield, of Sidney, was the guest of Miss Dolly Thomas for the greater part of last week. Miss Corfield left on Friday for her home in Sidney, on Mr. Inglis' launch "The Laisie."

Mrs. J. Dekin, of New Westminster, formerly a resident of James Island, and Miss Gill, of Bellingham are the guests of Mr. and Mrs. W. Thomas.

Mrs. Mercer and family of Victoria spent a week on the Island returning to Victoria on Saturday last.

Mrs. F. Noakes, who went to Sooke for a week to visit an old friend, returned on Monday.

Mrs. L. J. Prosser and two sons, Ernest and Douglas, are visiting here as the guests of Mr. and Mrs. Herbert Rowbottom. Mr. Prosser was also a week-end visitor but was obliged to return to his home in Seattle Monday.

Fred Rowbottom, of Nanaimo, a nephew of Mr. H. Rowbottom is also spending a week or so here.

Mr. and Mrs. F. Sherwood, Nanaimo, who lived here two years ago, were the week-end guests of Mr. and Mrs. W. Rivers.

Mrs. Smiley had two visitors last week-end—her mother, Mrs. Dalgleish, of Victoria, and Mrs. Burtucci, of San Francisco. Mrs. Burtucci will be better remembered as a cheery smiling little person who worked here in war time, whom everyone known as "Jake."

On Thursday, July 5, Mrs. W. Bond received word that her mother Mrs. Wallace, accompanied by her daughters, Bessie and Jean, were starting on their journey to California, via Seattle, to join her husband and sons who have been in California for some time.

Mr. Newbury has his wife and family staying here for an indefinite period.

Mr. and Mrs. Spencer and family have returned from a week's holiday at Port Angeles.

Mrs. David Thomn and two younger sons, Donald and John, were visitors on the Island on Saturday. They came to the spot where rain caused postponement until the 14th, weather permitting. Miss M. Morrison was another visitor.

Mr. Lake, sen., is spending his holiday in Nanaimo and Vancouver.

Owing to the inclemency of the weather, the sports, which should have been held on July 7, were postponed for a week, and weather permitting will take place on Saturday, July 14. Much disappointment was felt at the

F. F. FORNERI.

NEWS OF THE WEEK FROM MAYNE ISLAND

(Continued from page one)
Salmon are running well in the Pass now.

Mrs. Ward and daughter are staying at the Mayne Island hotel. Mrs. Ward's husband is a cousin of Mr. Worge who resided on Mayne for many years.

Mrs. G. Maude returned from Galiano Sunday evening, she had been a guest of Mrs. Elverston.

Mr. Hall is making heavy shipments of tomatoes these days.

Mrs. Guardim returned to Pender last Friday.

Mr. Cain had a pleasant surprise a few days ago—Mrs. Pearce a guest at the vicarage found out that the Mr. Cain with a splendid tenor voice whom she used to know at picnics on Cains Beach, 30 years ago, was our Mr. Cain living on Mayne Island. Mrs. Pearce lost no time in renewing the acquaintance. We are now begging Mr. Cain to let us hear his voice at our concert, July 12.

The Vicar and Mrs. Porter left for a few days in Victoria on Tuesdays boat.

Miss Freeman who has been a guest of Mrs. Jim Robson was a passenger on the "Princess" Tuesday. Some of the finest raspberries to be seen this year have been grown by Mrs. Blair.

Wednesday Mrs. Pierce arrived from Victoria to join Mrs. M. Clonnel in her camp in Mr. Naylor's orchard.

The W. A. had a very pleasant gathering at Mrs. Naylor's after the business had been transacted. Mrs. Naylor served a most refreshing tea. Mrs. Rawling became a member of the W. A. Seven members were present. Mrs. Pierce and Mrs. Clonnel joining the party.

Paris last year had the largest percentage of divorcees to the number of marriages of any city in France. Statistics show that during 1922 there were 5,237 decrees of divorce granted as compared with 38,659 marriages celebrated in that city.

CAR SKIDS OVER EMBANKMENT

Plunges From Malahat Highway at Point Near Summit and Goes Down Embankment

Mr. Austin Craven, a fireman of the Esquimalt & Nanaimo Railway, residing on Queen's Avenue, Victoria, and passengers in his Nash car, including his wife, his mother-in-law and two children miraculously escaped being injured Sunday morning when his car plunged over the embankment on the Malahat at a point near the summit of the highway, a short distance south of the Hamsterley Farm refreshment booth. It is stated that the accident, which occurred about 11.30 o'clock, made the third of a similar nature to happen during the past thirty days. The Provincial Police department reports that the point is a particularly dangerous one and that a strong protecting rail should be erected there. None of those in Mr. Craven's car were hurt and the car was but slightly damaged.

NEWSY PARAGRAPHS FROM PENDER ISLAND

Splendid Record of the Jersey Bred "Lady Jane Champion," Formerly of this Island

(Review Correspondent.)

PENDER ISLAND, July 10.—In a number of papers during the past week has appeared the photo of another record-breaker in the Jersey breed, "Lady Jane Champion," 3490 C.J.C.C., who was formerly the property of Messrs. A. H. Menzies & Son, and now owned by the University of B. C. She is the highest record mature Jersey in Canada for 1922. Her production of 16,258 lbs. of milk and 776 lbs. fat in 365 days places her third for milk, and ninth for fat amongst the Jerseys for Canada, also first for milk and third for fat in B. C. This completes her sixth yearly test, at 9 years of age, her total production during that time being 66,120 lbs. milk, and 551 lbs. fat per year for six years. This cumulative milk record is unsurpassed by any other cow of the Jersey breed in Canada. She is a daughter of "Buff's Lassie," who is also a famous champion of former years. It is pleasing to know that some of the best Jerseys of Canada are raised right here on Pender.

Mrs. Montague Bruce is visiting her brother, Mr. Cyril Hamilton. Misses Margaret and Beth Brackett returned home from Brambrton on Thursday for the holidays. Miss Margaret expects to remain at home for an indefinite period this time.

Mr. Will Hawkes has his mother and brother from Victoria visiting him for a week or so.

Mrs. Taylor is again at her cottage after spending the past two months in Victoria.

Mrs. Walker, accompanied by her two children, arrived on Wednesday from Coronado, California, and will spend the summer with her mother, Mrs. Davenport.

Miss Ruth Hoffman visited her cousin, Miss Jean Brackett, for a few days this week.

The engagement has been announced of Miss Vivienne Margaret Geldart, formerly of St. John, N.B., and now of Haney, B.C., to Mr. Victor William Menzies, of this Island. The marriage will take place in Vancouver on the 18th of this month.

Mr. Tom Norris is visiting his uncle, Mr. E. Hooson, this week.

Mr. and Mrs. Sharpe, of Vancouver, are the guests of Mrs. E. Pollard, "The Maples."

Misses Elsie and Edith Bowerman accompanied their cousin, Miss Dorothy Harris, to Victoria on Tuesday, where they will spend a pleasant holiday.

FAVORS CONFINING HENS

Poultry Raiser Finds Egg Production Greater When Liberty of Flock Restricted

If hens are to be kept laying to the limit of their ability during the summer, they must be given special attention. Any flock of hens that does not produce eggs at the rate of 50 per cent during the summer months is either not well bred for laying, or does not get proper attention.

The notion that hens can find most of their own living during the

summer is erroneous. They can find a living, it is true, but they can not find enough to eat to keep them going, and enough more to supply them with the material for as many eggs as they must lay to pay their expenses, not to mention profits.

Our laying hens are fed the same during the summer as at any other time. We keep them confined the year through, almost all the time, because long experience has taught us that when they are allowed full liberty they do not lay as well as when they are kept in their houses. It they are at liberty during the summer, they run around so much and wander so far that they keep themselves run down, and their production of eggs is not satisfactory.

During the cooler months we give the hens considerable liberty, but in hot weather we keep them under strict control, and they pay us for doing so.

Every day during hot weather they are given fresh cold water at least three times every day; that is, the water in the drinking vessels is renewed or placed with fresh water, morning, noon and night.

They get lawn clippings or fresh lettuce every day in liberal quantities. In the morning they are given all the wheat they will eat in half an hour, and in the evening a mash made of a mixture of finely-cracked corn, bran and shorts, ground oats and meat scrap. They are allowed to fill themselves with this mash.

The sleeping rooms are sprayed and disinfected frequently, and the hens are contented and productive. When they begin to molt this fall, they will be turned out, and allowed to run until cold weather comes.

LEST WE FORGET

The Editor, Sidney Review.

Dear Sir:

Whilst the Government of British Columbia—with the assistance of "Cotton"—is transforming Beacon Avenue into a "Silky" way for the traffic, would it be out of place for those of us who have children at school or pay school taxes to draw the Government's attention to the fact that it is taking no notice, winking at or forgetting the physical development of the children and young people—the men and women of the future—attending the Sidney public school? People who are interested in the welfare and physical fitness of the rising generation should take a walk up to the Sidney public school stop, look and listen! Then on Saturday evening next at 7 o'clock (standard time) 8 o'clock daylight saving time, they should go to the rate payer's meeting in the public school and demand that the Government provide a proper playground for the school children. Another thing, it is just about time we had a qualified "male" assistant teacher—Pave the way for the kids, the old people can look after themselves.

BOB SLOAN.

RUDE RURAL RHYMES

SUSPENSE

The doctors held a consultation, decided on an operation, then told this bard they must admit the game was on and he was it. They said they hardly could avoid some tinkering with his mastoid and whether he survived or not, depended on the luck he'd got. O brothers I was living on, all quiet just like you or John, when suddenly they said to me, step up and face eternity. Now as I gazed thereon, gadzooks, I cannot say I liked the looks. Not one of all the cherubim has anything on our boy Jim—I'd hate to leave my charming Hannah, and with strange angels sing Hosanna. I have so many things begun, so many things not yet half done, sweet fruits of life I have not bitten and rural rhymes I have not written, I'd hate to leave them in the lurch and go head foremost into church to let the parson work his jaws and tell how good a man I was. It may be good for any gink to stand a while upon the brink, of all his sins and such to think. But as for me I hope when next the preacher picks my funeral text, the doctors will not come and stand beside my bedside in a band, all pointing to the promised land. O friends, I hope I'll not be knowing, just when they think they've got me going.

—Bob Adams.

"I Had Terrible Backache From Kidney Disease"

Mrs. M. A. McNeill, Canaan Sta., N.B., writes:

"I was troubled for years with terrible backache, resulting from kidney disease. At times in each month I remained in bed, the pain was more than I could stand, and to walk was almost impossible. I used about \$50.00 worth of other medicines, but with little results. Now I am completely better, after using only five boxes of Dr. Chase's Kidney-Liver Pills.

In the Crow's Nest

CROW'S NEST.
ON THE WAY TO CROW'S NEST—THE
HIGHEST WOODEN BRIDGE IN THE
WORLD.

Rolling up to the Crow's Nest Pass are olive green foothills without a tree upon them—natural catclaws clothed with succulent short grass. Here are seen occasional outcrops of rock, which in their four or five feet of height show all the characteristics of a mountain range; miniatures of the Rockies, with crag and precipice and col reproduced on the smallest scale. With a bag of salt one could lay on glaciers, touch the peaks with white and have a toy range which any Eastern schoolteacher could set up in her classroom with advantage to herself and her pupils. Canadians east of Medicine Hat know too little about the construction of this Continent and about the glorious engineering of Nature.

Consider the Crow's Nest itself. The name brings before some of us a schedule of railway-rates; to others, a series of coal mines. These are derivative impressions. The original Crow's Nest is a mountain rising to 9,000 feet and more above sea-level and visible for many miles. The rock-peak, as one looks from the foothills is set like a fuzzy, round crow's-nest on the sky-line. Leading up to it are the olive-green billows fading into a soft, blue haze.

In the distance near the peak is a snow-white precipice, which they tell us is two miles wide and a mile high. It is all excellence and loveliness until one travels twenty miles farther. Then it gleams like the fangs of a wolf. It is the rock-face of Turtle Mountain, cleft from top to bottom in 1905 to the destruction of the mining town of Frank.

To-day the whole valley, two miles wide, is a tempestuous chaos of white stone blocks, some of them as big as a house, all with jagged edges and sharp corners. They are piled from fifty to one hundred feet high above the original valley level. The railway line climbs over the debris. Beneath it lies the broken city. On either side of the avalanche stand a few deserted houses, windows out, glaring like skulls upon the newer town. The whole valley spells terror and tragedy. Even yet people talk of Pompeii and Herculaneum, but they are like to forget the more terrible fate of Frank when rock by millions of tons fell a mile out of the sky.

CROP REPORT

Below will be found a brief synopsis of telegraphic reports received at the head office of the Bank of Montreal from its branches. The branch managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts mentioned.

General

With remarkable unanimity the bank's branch managers report indications for unusually good crops in nearly every part of the Dominion. In the three Prairie provinces conditions are most satisfactory. There has continued to be ample moisture and grains are making rapid growth, the only drawback being damage by hail in Southern Alberta. In Manitoba some of the wheat is already heading out. Throughout Ontario a good all round crop is expected. In Quebec and Maritime provinces the crops are somewhat backward but improving, while in British Columbia all crops are doing well. Details follow:

Prairie Provinces

Ample moisture and good growing weather, serious hail damage confined to Southern Alberta. **Edmonton District:** Prospects continue favorable. Rains have been general; no damage from hail. **Calgary District:** Abundant moisture, a hail storm during week end in Okotoks and High River district caused considerable damage, otherwise conditions continue good. **Lethbridge District:** North of High River and South to Raymond there has been heavy hail damage; elsewhere conditions are good. **Saskatoon District:** Crop conditions very promising. Ample moisture, all grains advanced. No material damage of any kind reported. Hay crop good. **Regina District:** Conditions favorable; crops making healthy progress. Heavy general rains have insured ample moisture for next two or three weeks; slight damage from hail in few districts. Hay and pasture good. **Winnipeg District:** Conditions continue favorable. Ample moisture followed by cool weather. Wheat is in shot blade practically all points and is headed out in some districts; coarse grains fair. No damage from frost or hail. Pasture and hay are good.

Province of Quebec

Oats have improved somewhat of late; reports on hay prospects vary considerably, but on the whole an average crop is expected. Pastures remain in good condition. The late season has kept crops back and in general they are not in such good condition as this time last year.

Province of Ontario

The third week of June was very warm and during the last week showers have been general throughout the province and have stimulated growth wonderfully. Conditions generally show satisfactory prospects for a good all round crop. Hay a big crop and cutting well under way. Clover excellent. Fall wheat is filling well and beginning to ripen. Indications are for a good crop. Barley good crop. Peas good. Corn a little backward but progressing rapidly. Weather conditions ideal for root crop. Spring wheat and rye acreage small, both crops satisfactory. Fruit prospects fair with exception of raspberries, which are below average. Pasture abundant.

Maritime Provinces

Season has been dry and backward, but recent rains have greatly improved the situation. All crops are now progressing favorably. Present indications point to a large apple crop.

Province of British Columbia

All crops are looking well under favorable weather conditions. A good crop of hay is being cut. Grain promises to be above average, but root crops below normal. Apples have set heavily in the Okanagan Valley. Cherries have been dropping and will be below average. The strawberry yield was below average and the market poor. Pasture is in good condition. The grasshopper menace is past.

UNION CHURCH LADIES' AID

The July meeting of the Union church Ladies' Aid was held at the home of Mr. Macdonald. There was a good attendance. Mr. Macdonald, conveying the ladies by car, which was greatly appreciated. A financial statement of the Strawberry Festival was read by the treasurer. The annual picnic was discussed but further details will be furnished later. At the close of the meeting delightful afternoon tea was served with the lunch by the hostess, Mrs. Wilkinson.

NEWS BUDGET FROM PATRICIA BAY DISTRICT

(Review Correspondent)

Dr. McLean, Minister of Education, and Mrs. McLean and children, Jessie and Betty, of Victoria, visited here last Sunday. Mrs. Watson, mother of Mrs. McLean, formerly of Owen Sound, Ontario, also visited here. Mrs. McLean is the cousin of Messrs. James and Robert Bryce.

Mrs. Drury and son, Mr. Eric Drury, formerly of Europe, but now visiting in Victoria, residing at "October Mansions," accompanied by Mr. Kenneth Drury, of Victoria, visited friends at the Bay last Sunday.

Mr. and Mrs. Mosedale and children, Cissy and Walter, of Victoria, accompanied by Miss Edna Thomas, of Vancouver, were the guests of Capt. and Mrs. Livsey last Sunday. Miss Thomas is the niece of Capt. and Mrs. Livsey, of the East Road.

Miss Irene Frost, now of Victoria, spent the week-end at the Bay with her parents, Mr. and Mrs. C. A. Frost.

Our correspondent was wrongly informed when she was told that Sir Henry Thornton was a visitor to Mr. and Mrs. Clarke Davidson. We take the opportunity of apologizing for any annoyance caused.

Here and There

In 1922 Canada produced minerals estimated to be worth \$180,622,000, an increase of practically \$6,000,000 over the previous year.

A British silk manufacturing firm has decided to establish a large plant near Quebec city for the manufacture of artificial silk yarn.

A train nearly a mile long and drawn by a single locomotive recently carried 165,000 bushels of grain over the Canadian Pacific western lines.

Almost sixteen and a half million bushels of wheat were exported from the port of Vancouver during the period September 1, 1922, to May 31 of the present year, according to figures issued by the Merchants Exchange.

Among the large number of unaccompanied women on the last westward voyages of the Canadian Pacific liners "Montclare" and "Melita" were twenty-three who were coming to Canada to be married in various parts of the Dominion.

An official in charge of the cattle shipments from the Port of Montreal recently stated that nearly 40,000 head of store cattle would be shipped from the port this year. He declared the rush seasons would be the months of August, September and October.

On her last eastward voyage the Canadian Pacific liner "Empress of Canada" established a new trans-Pacific record of 8 days, 10 hours and 55 minutes from Yokohama to Vancouver. The previous record, 8 days, 18 hours and 31 minutes, had been held since 1914 by the "Empress of Russia" of the same line.

If public deposits in banks and loan companies can be taken as a fair indication, the Canadian is the world's richest man, according to a statement made by F. A. Hatch, retiring president of the Ontario division of the Canadian Manufacturers' Association. These deposits amount to more than two billion dollars, or \$250 per capita.

According to a report of the Dominion Bureau of Statistics, 62,273,169 tons of railway freight originated in Canada in 1922, and 26,581,631 was received from foreign connections, making a total of 88,854,800 outgoing. Also 62,549,578 tons terminated in Canada and 25,438,906 were delivered to foreign connections, making a total of 87,988,484 tons.

A distinct type of sheep, adapted to prairie range conditions and said to possess superior wool and sheep qualities, has been developed by R. C. Harvey, an Alberta sheep raiser. It will be known as the "Rommellet," and has been evolved after eight years' experimenting with crosses of the Romney-Marsh with the Rambouillet. As evidence of the wool production from this species, Mr. Harvey's annual clip is 120,000 pounds.

That Canada was gradually becoming more and more of an industrial country, and that Canadians themselves were not truly aware of the fact, was the opinion expressed before the Winnipeg Rotary Club by Prof. R. C. Wallace, of the University of Manitoba. He stated that during the past twenty-five years the population of Canada had increased 80 per cent., the railway mileage 120 per cent., while the industrial life of the country increased 700 per cent.

St. Hyacinthe, Que., has the distinction of having developed the world's largest organ plant, and by native invention and improvements evolved an instrument which receives praise from the world's first artists. An organ recently shipped by Casavant Freres of that place to Paris, France, is absolutely the first to leave the American continent for Europe, the movement having heretofore been in the opposite direction, and was so shipped because the purchaser desired the finest and best up-to-date instrument that could be secured.

OFFICE DOG

Hello folks, a doctor says people should not eat while worried. But if they didn't have to eat, most of them wouldn't be worried.

And Then She Turned Pail

The dairymaid pensively milked the goat.

And, pouting, she paused to mutter,

"I wish, you brute, you'd turn to milk!"

And the animal turned to butter.

There is a married pair in Portland, who are really happy. He lives in Oregon, she in Maine.

Little boy, (visiting parliament buildings): "When are we going to see the red tape?"

No, Gladys, the Corinthian column was not evolved by the Office Dog columnist.

Next to the road hog, the worst animal in a car is the man who won't dim his lights.

We know a girl who is so modest that she blushes when the radio announces bedtime stories.

Lies buried here
One William Furrell,
Who dropped the wheel
To grasp the gizzard.

A woman's mind is seldom made up, but the rest of her sure is.

When we grow up we want to be a street car conductor so we can tell everybody where to get off at.

The aviator who fell near Providence, R. I., came darn near flying in the face of Providence.

A business, like the plants in the field, begins to go to seed as soon as it stops growing.

Before they were married she used to read poetry to him. Now she reads the riot act.

A jazz tune popular a year or so ago was appropriately entitled "Kitchen on the Keys." I heard a new one the other night, proclaimed, Fido, but did not learn its name, though I am certain it was "Baby on the Saxophone."

Who is this person Action that everyone strips for?

One reason why there are so many suicides nowadays is because it takes so much courage to live.

ANOTHER PEST

My favorite pest
Is Eph O'Pratt,
He always says
"You're getting fat."

A face that cannot smile is seldom worth while.

Our wife says there are some people who make fools of men, but there are more who make men of fools.

Good times are those not used as a topic of conversation.

It is easy to cow the man that looks sheepish if you threaten to lam him.

We've heard of no casualties so far resulting from the ultimate consumer getting hit by falling prices.

Perhaps the easiest way to amuse criminals would be to let them listen in on the deliberations of juries.

Pittsburgh minister has been censured for preaching broad sermons. But no sermon is as broad as it is long.

Some of those slow moving pictures should be made of movie stars marrying so we could see how they do it so fast, suggests Phil.

The fellow who tries to lie out of a mistake, has discovered a form of perpetual motion.

The richest man in the world is the one who is satisfied with what he has.

The Artist

"A fine stenog you are! Call yourself a typist and don't know how to put a ribbon on a typewriter."

"Does Paderewski know how to tune a piano?"

The reason ideas die quickly in some heads, thinks Bob Sloan is because they can't stand solitary confinement.

INTERESTING FULFORD HARBOR NEWS ITEMS

Enjoyable Play Given by the Salt Spring Dramatic Club to a Crowded House

(Review Correspondent.)

FULFORD HARBOR, July 10.—A very enjoyable evening was spent here last Friday when a large crowd turned out to see "Jane", a farce in three acts given by the Salt Spring Dramatic club. A dance followed which was kept up until the small hours of the morning the music was supplied by the South Salt Spring orchestra. The sum of sixty dollars being cleared.

Miss Molly Akerman is home for the summer holidays. Mrs. and Miss Restall, who were residents at the White House for a couple of weeks, have returned to Victoria.

Mrs. and Mrs. Finlayson and Mr. and Mrs. Kielgell are staying at the White House.

Mr. Frank Aske is the guest of Mr. and Mrs. Reid.

Mrs. and Miss Officer are the guests of Mr. and Mrs. J. Shaw.

A serious accident occurred at Stowell Lake last Sunday while some of the local lads were in swimming. One of them had the misfortune while diving off the float to drag some of the shirts belonging to the other lads into the water with him. The shirts seemingly sank to the bottom of the lake and could not be recovered, but we hope Mr. Eaton of the local store will benefit by same.

Mrs. Johns and Miss Dohman, who have been teaching school here have gone home for the summer holidays. Miss Johns who is not returning at the beginning of the next term will be sadly missed, we believe, by some of her young friends.

The many friends of Col. Brvant will be sorry to hear he is confined to bed with rheumatism. It is hoped he will be able to be up and around again soon.

On Sunday, Fulford Harbor had the pleasure of a visit from some of the residents of Sidney. We hope they returned home with a good impression of the beautiful scenery around the White House and harbor.

Mrs. Cearley and family left on Saturday for Oregon.

FIDDLING WHILE THE FORESTS BURN

While our forests burn there are many fiddling Neros, the woods are full of them, so to speak.

Talk of the great loss of national wealth through the yearly forest fires has grown in volume from year to year. Politicians, government officials and pulp, paper and lumber men, are loud in their condemnation of conditions. But concrete suggestions as to how the situation might be improved are lacking. The lumbermen have been laying the blame on the prospector and vice versa.

If someone with the authority got representatives of these two pioneering interests together, it might be that they would get somewhere in dealing with the problem. The avoidance of one fire would foot the bill. Perhaps these men would suggest that no one be allowed to enter the bush on a hunting, timber cruising, prospecting, or any other kind of trip without getting a permit at the nearest point of entry. Certainly something drastic seems to be necessary.—The Financial Post.

SPLENDID POSSIBILITIES IN B. C.

Trade of the world is trending towards British Columbia. Commerce of all Canada and inter-related with the business of the North American Continent is considering the ports of British Columbia and the splendid resources of this wonderful province on the Pacific Coast. There are reasons in abundance for the substantial prosperity of British Columbia today. Built upon a sure foundation of raw materials, resources, and power in abundance, the real wealth of the province is only beginning to make itself apparent as an economic factor of immense importance to the Dominion and indeed to the world. In part the Panama Canal is responsible for the much more marked recognition of British Columbia's worth which has become in these times apparent. Keels carry not only cargoes but also conviction when it comes to the conveyance throughout the world of economic intelligence of the first importance. Swift and successful shipments to and from the ports of British Columbia have awakened the great trade consciousness of many maritime markets to a realization of all that the pioneers of British Columbia have reiterated often upon heedless hearers during the past. Triumphant today are the pioneers of B. C. justified. British Columbia is coming into her own. Commerce is crowding into its ports from both the landward and the seaward sides. Wheat from the prairie provinces gradually withdrawing from the annual struggle to force its way to world markets through the congested channels of eastern rail and lake traffic is finding its way in rising flood through the splendid sea-gateways of British Columbia that usher forth the ships safely and without wintry delays on their way to world markets via the Pacific Ocean and the Panama Canal which makes all the Atlantic also theirs to command without breaking bulk of cargo. Trade of the Orient and of the Occident both is at the doors of British Columbia. Records of the progress made by the province of late bear witness to the prosperity resulting from the splendid position occupied by Canada's Pacific Coast province in relation to the Dominion, the Continent and the rest of the world. Besides the potentialities represented in the location of the province in the economic geography of the world, there are in possession of British Columbia resources in raw materials, water-powers, agricultural developments and possibilities, and minerals which would of themselves be sufficient to place B. C. in the very front rank of production and natural wealth among the countries of the world reckoned on even the most conservative standards. When it comes to be considered that with a population of only just over the half million or so, British Columbia can produce in agriculture over \$64,000,000 per annum, in mining over \$35,000,000, in lumbering, close on \$100,000,000; in fishing, over \$12,000,000, and in general industrial work over \$50,000,000, it will be seen that here is a province not to be lightly passed over in any study of the world while economic factors of Canada. Add to the resources of the province and their return in real wealth a knowledge of the sound administration of these splendid assets, and you gain the conviction that British Columbia has indeed something to offer the investor, something that will more than repay industrial investment, and that will ensure for all forms of capital investment rock-ribbed security and substantial returns. The policy of the government is to keep current expenditure within the revenue, and this is being done. Sinking funds are fully maintained for all long term debt. British Columbia's sinking funds equal those of all other Provinces out side Ontario.

Enterprising and yet thrifty, energetic and yet cautious in carrying out their undertakings the people and the government of British Columbia which represents them reveal all the best and most sterling qualities of the British race. Hardly a tenth part of the resources and economic potentialities of their province has been touched. There are over 50,000,000 acres of fine agricultural land still available; there are coal resources amounting to 83,828,523,000 tons; there is timber amounting to 349,568,000,000 board feet. Pulpwood resources have been barely scratched. Waterpowers are available in the greatest abundance and most conveniently for rapidly growing industrial centres. Mineral wealth of B. C. is almost incalculable; only a fraction of the possible output of the province is annually mined, and each year sees new discoveries of enormous value. Copper production runs to over \$7,000,000 annually, and zinc to \$5,000,000 while gold returns close on \$3,000,000, silver \$2,205,321, and lead over \$1,500,000. Fisheries are immensely important, and the province is a superb field for the activities of the hunter and the tourist.

SERIES OF BEE-KEEPING ARTICLES

XI.—How to Transfer Bees.

HOW TO TRANSFER BEES

What Transferring Means

Beekeepers understand the term transferring to mean the changing of bees from one hive to another. Usually this signifies transferring from a non-movable frame or box hive to a movable frame hive. A reasonable return cannot be secured from bees which are kept in box hives. Previous to the invention of the movable frame or movable comb hive by L. L. Langstroth in 1851, all bees were kept in hives in which the examination of the combs was impracticable. Many bees are still kept in box hives by careless beekeepers. The complex manipulations of modern beekeeping make it imperative that all combs may be examined by the beekeeper. If you expect to make money or to derive any pleasure from your bees, they must be kept in a movable frame hive. However, transferring will not insure success unless care is afterwards given the bees. Modern hives only facilitate the manipulation of bees which is necessary in beekeeping. The change simply insures a greater return in money.

Buying Box Hives

One way to start beekeeping is to buy bees in box hives in your immediate neighborhood and to transfer these bees into movable frame hives. This way of beginning is not recommended as there are several other methods of starting beekeeping which are preferable. However, a beekeeper is often forced to buy up box hives in his neighborhood for protection. The average yield of honey from bees cared for by modern methods is many times that possible from bees kept in box hives, no matter how skilled the beekeeper. In buying box hives pick out those which are heavy with honey and from which the bees are flying well.

When to Transfer Bees

The best time to transfer bees from box hives is in the spring of the year just before swarming time. This usually prevents further swarming that season by the transferred colony and may also enable one to secure a crop of honey. It also gives the bees a long, warm season ahead to build up for winter. In cases where bee diseases are suspected or the bees in box hives are in poor condition, they should not be bought. It is not advisable for any beginner in bee culture to attempt the transfer of bees from the walls of buildings. When bee trees are found and cut down the bees may be transferred just as though they were in box hives. The conditions are identical. Do not daub the bees, hives or premises with honey in transferring. To do so may start the bees robbing or may transmit bee diseases.

"Drumming" Transfer Method

To transfer bees by this method, remove the box hive from its stand to a convenient working place nearby. The new hive into which the bees are to be transferred should be placed on the stand formerly occupied by the box hive. Turn the box hive bottom side up, first smoking the bees to prevent stinging. Tear off the bottom of the box hive. Place above it a box which practically fits the box hive top (formerly the bottom), and into which the bees may be driven. Take a stout stick in each hand and begin drumming on the sides of the box hive, tapping quite hard. Use smoke as necessary. When most of the bees are up into the box, it may be carefully removed and the bees shaken out in front of the new hive, into which they will crawl. The drumming may be repeated as often as necessary. Combs or frames containing full sheets of bee comb foundation should be in the new hive. The bees should be fed for a few days after transferring, especially if no nectar is available in the fields. It is imperative to get as many of the bees out of the old box hive as possible, as unless the queen bee is driven out, the plan will fail. It is not necessary to look for the queen in transferring. If most of the bees leave the box hive, she is likely to. A bee entrance guard may be placed in front of the new hive for a few days to prevent the transferred bees from swarming out.

Guard Against Bee Disease

When the work has been completed, place the box hive back on the stand close beside the new hive, facing it in the same direction. Close up the box hive tight, and then over a small hole made in the box hive place a Lewis bee escape, so that emerging bees when leaving the hive will be trapped outside and forced to go in with the bees in the

new hive. At the end of 21 days, when all bees in the old hive will have emerged, most of them will have been trapped out. At this time, the old hive body should be broken up and any remaining bees shaken before the new hive. The old box may then be burned and the combs it contained melted down for beeswax. Any honey in the old hive may be eaten or fed to the bees now in the new hive. Since bee diseases may be transmitted by feeding honey to bees make sure you do not buy diseased bees. If you cannot be sure, do not buy them. Demand from the seller an inspection certificate from the apary inspector of your state.

The Easiest Method

A well recommended way to transfer is to turn a box hive containing bees on its side or bottom side up on its stand and after removing the side or hive bottom, to place over it a prepared hive body containing combs, honey or full sheets of bee comb foundation and having a cover but no bottom-board. All openings in the box hive must then be closed bee tight and an entrance made by inserting two sticks of wood, one quarter inch thick, at the front between the body and the box hive. Bees dislike to have brood below the entrance and the queen will soon start to lay in the new hive above. A queen excluding zinc may then be placed between the new and the box hive, preventing the queen from going below again. At the end of 21 days, after putting on the queen excluder, break up the old hive, unite any remaining bees with those of the new hive body and leave the new hive body on a bottom-board on the same stand. This method should be used in spring just before swarming time.

Requeening at Transferring

If requeening is planned and a queen is on hand at the time of transferring, she may be lightly daubed with honey and run into the new hive with the bees when they are shaken before it. The queen with the bees must first be killed. Requeening may be accomplished any time after transferring by following the directions accompanying the queen you buy. Since worker bees average but 45 days of life in the height of the working season, the new queen's progeny will soon replace the other bees in the hive.

USEFULNESS OF COVER CROPS

Cover crops in an orchard are an essential part of good orchard practice. As the maintenance of humus or organic matter in the soil is necessary to retain proper physical condition, and as manure is becoming more difficult to obtain, and can be used probably to better advantage on other parts of the farm, cover crops fill a very useful purpose in this direction alone. Crops that will make a good growth serve to increase the humus in the soil, but by selecting a leguminous crop such as clover, vetch or pea, not only may humus be added, but also it may be possible to increase the nitrogen content of the soil, thus obtaining a two-fold advantage from the cover crop.

In the colder part of the country, where well ripened wood of the tree is necessary to ensure a chance of proper wintering, it is considered necessary to utilize a cover crop in conjunction with the clean cultivation system. For this purpose the crop is sown about June 30, allowed to grow all summer and fall, and plowed under the following spring. The cover crop will thus draw upon the soil for moisture and food at a time when the tree should be ripening its wood, and will also serve as a means for holding snow, thus assisting in protecting the roots of the trees from severe conditions.

The use of cover crops in connection with bush fruit plantations has not been developed to any appreciable extent, but with the growing scarcity of manure there seems to be no reason why a combination of fertilizers and cover crops could not be adopted as good practice on areas where raspberries, currants, and gooseberries are being grown at proper distances. Such a combination offers many advantages, where cost of regularly applying manure is becoming prohibitive.

Following are some of the most important crops used for this purpose:—Leguminous: red clover, crimson clover, summer vetch, field pea; non-leguminous: buckwheat, rape.

SLATS' DIARY

(By Ross Farquhar.)

FRIDAY—I tuk a long walk and winded up by stopping at the grave yd. and had a long talk with the Janitor of the same and we got to talking about 1 thing another & he sed Sunny if these here dead people cud raise up and tawk they cud tell you a awful lot. I sed Well if they wood raise up and wanted to tell me enny thing they wood half to tell it by telephone. Or mebbly Radio.

SATERDAY—Ma went away to spend the weak end with sum frends of hern & a good time has ben had by pa and me so fur. When she went it was like a Bank holiday. we dont sprinkel the lawn or wash the dishes or etc. but of coarse we will be glad to see her when she returns back agen

SUNDAY—Pa says mebbly we will move some place another 1 of these days. I dont care much where it is but they are 1 town I dont want to go and live in and that is called Ambush. Every nite in the noosepaper I here pa read about sum buddy gitting shot from Ambush. I xpect they are a lot of Bootleg wisky there mebbly.

MONDAY—Pa says we simply got to economose next winter more than formerly in the past. I think I will offer a sugestion to him. I offen herd him say it costed a hole lot to send me to skool so I am going to offer to stay out next yr. Then mebbly we can get a new 2ond handed ford.

TUESDAY—Jane & me dussent tawk much enny more. We went out to the plenich on the buss today and it was awffy crouded. I maniged to get a seat but Jane cudent find none and when we got there she woodent have no more to do wit hime. After 1 had spent a good dime on her.

WENSDAY—Went to a speaking tonite to here a polished Orator. I offen wandered what they ment by a polished Orator but now I resa I no what it means. For this fellow had a ball hed witch sure did shine.

THURSDAY—I ast pa what the signests ment by the Conversation of Energy and he sed Well I cant xactly define the meaning of it but if you was ever at a woman club meeting or a afternoon matinee why you will redly understand what they mean by Conversation of Energy.

a Lunatic Asylum
By HEADON HILL

CHAPTER XVII.

The Reform of Doctor Zincraft

Victor Vantbrace, pausing in Zincraft's doorway, turned and looked curiously down the stairs after the retreating night-hawk. He knew Bully Beamish as a prowler around the flash resorts of the metropolis, and he knew him better by repute as the likely author of more than one of those tragedies which end in a coroners inquest and a verdict of "Found Drowned."

For a reason best known to himself, the sight of the ruffian at that particular time and place supplied the germ of an inspiration for which he had been searching since the previous evening, and he stored it in his mind for incubation.

"Why, old 'un, that's a nice beauty you've been harbouring," he exclaimed as, followed by Percy, he entered the room.

The little doctor, thanks to his enforced sobriety, had already been smart enough to coin the necessary lie for the pacification of his fair visitor, listening unsee in the inner room, as he felt very sure.

"I did not know he was here, Vic," he replied; "I give you my word I am as astonished as you are; I allowed the fellow to sleep in my rooms after he had steered me home—"

"Ah, yes; he is a bit rough, but I have heard that he steers chaps to their diggings quite tenderly—for a consideration; makes a sort of profession of it," interrupted Victor. "You might give him a turn some night, Percy," he added playfully.

"And I thought he had gone," Zincraft went on; "he was rather bad last night, you see, and I am not as perceptive as I might be this morning, perhaps."

"You seem rather more spry than usual, I should have thought," said Vantbrace carelessly. "But it doesn't matter so long as you can sign your name to Mr. Milborne's life-assurance proposal."

The crow's-foot round Zincraft's eyes, crinkled into a mirthless smile under the implied contempt. It pleased him that his employer should fall into the error of taking his weakness as chronic and himself of no account. In order to foster the notion he feigned hesitation in appending his signature to the document which Vantbrace laid before him, but once written, his calligraphy left nothing to be desired. As to making any pretence of a medical examination, it never crossed his mind to go through such a farce.

Vantbrace having paid his fee and departed with his candidate to take the proposal to the assurance office, it was not long before the bedroom door opened and Nina Elmslie reappeared. To Zincraft's great relief she seemed to have accepted the statement she must have overheard as to his ignorance of the bully's presence in his rooms. At any rate, she not only spared him the storm of abuse he had expected, but laughed heartily at his "strange guest's" hasty flight.

Then, seemingly struck by a sudden thought, she exclaimed, "But he must have heard our conversation about Flash Alf and the diamond!"

What cared Zincraft so long as he was not to incur her blame; and, as it happened, he had an answer to the point raised.

"That will not matter," he said, watching keenly for signs of her approval; "he's a thick-headed brute, equal to folling a man like a bullock or tossing over a bridge, but quite incapable of putting two and two together in a piece of headwork. Besides, I had already decided to make use of him for our purpose, to a limited extent, in a little scheme that is forming here."

He tapped his forehead, and, smiling, waited for her reply. It was a little time in coming, but was satisfactory.

"Yes," she said thoughtfully, "perhaps on the whole you are right. Your estimate of the man tallies with mine—so far as I could judge in the short time he gave me to form an opinion," she added, rather hastily.

Before she rose to go it was arranged that they should meet again for the doctor to report progress before the eventful Friday when the Indian mail was due. All preliminaries she would leave to him, but it was so nice to have a man to lean on, and she said as in the finish with him, she said, as Zincraft pressed her hand in farewell.

By the way, she called back after descending a few stairs, "there was a gentleman named Milborne

here with Victor Vantbrace just now. We have got a patient of that name—a girl you certified and brought in, I think, about six weeks ago. It would be a relation, I suppose?"

"The girl's brother," said Zincraft, his memory thus refreshed; "she is in at his instance. He is one of your dear Victor's intimates—not to say victims."

"Don't say 'my' dear Victor, after this morning and our compact," retorted Elmslie, with a bewitching toss of her head as she turned away. But once round the corner of the stairs her lips tightened, her eyes grew hard, and she muttered to herself, "After all these years to meet him like that. It took the starch, what little there is left, out of him fairly. Mr. Beamish is in a small way of luck though, I fancy, for if I am not mistaken, he has secured two commissions, both very much in his line, by seeing that old ape home last night. Victor's recommendation of him to the Milborne boy sounded interesting, in connection with a life assurance policy."

So she went her way, and in the meanwhile Doctor Zincraft was fighting out his battle in his dingy room—a battle between the five guineas which Vantbrace had paid him as a fee and the alluring vision that his fair visitor had raised.

The latter prevailed, and after hiding the five sovereigns in a long-disused instrument case he put the odd shillings in his pocket and went out, locking his door behind him.

"I can't go very far wrong on five bob," he said to himself, as he reached the street. "It shows how my heart is in it, though, to leave all that gold behind. I might have dined like an alderman and got as drunk as a lord."

With a wry face at his own quandary, which in itself proved the strength of his resolve, he turned his steps eastward along the Strand, and hurrying past many a well-known "house-of-call" for such as he, made his way to Drury Lane. Every moment of success in running the gauntlet of his temptation added to his confidence and when he arrived at his destination he wore an air of quiet self-possession.

That destination was a low-browed shop, having the name of "Spriggs, Wardrobe-keeper," over the door, and a stock-in-trade that might have been the sweepings of a pawn-shop in the mud-splashed window. It was, in fact, the same emporium of second-hand articles near to which Percy Milborne had engineered the cab accident in order to induce his sister to enter the Grey House brookham. The frowsy, maternal-looking woman and the sharp-faced Cockney girl who had witnessed that unholy deed were both sitting behind the counter now, but Zincraft was unaware that they had seen him on that occasion, and his business was, so far as he knew, unconnected with it.

"I beg your pardon, madam, but can I have a few words with you on a private matter—a very private matter?" he said, raising his shabby hat but as though he had been saluting a duchess.

The elder woman had started to her feet at his entrance, but after peering at him through the gloom of the ill-lighted shop she broke into a chuckling laugh.

"Bless me if I didn't think it was another 'tee,' she said. "It's that dark in here you gave me quite a turn, but I see I was mistook. Those pretty twins, Trevor and Godbold, have paid me a call this morning, and a little of that sort of gentry goes a very long way."

"I can assure you that my sympathies are quite on the other side," replied Zincraft politely. "But I confess to a feeling of surprise that you should be so ready to perceive it, for I believed myself to be a perfect stranger to you."

"So you are in a manner of speaking, but me and Gussie here have both seen you in queer company," said the woman, with a jerk of her thumb towards the girl, who was devouring Zincraft's face with her eyes. "We've seen you in the Collars and other places along with the boys that keep Masters Trevor and Godbold awake o' nights."

"When they make me stand here, for it concerns the welfare of a young gentleman known to fame in certain circles as 'Flash Alf,'" said Zincraft genially. "There is a kind of freemasonry among us men of the town, you see, and though I

am not personally acquainted with him I had a pretty good notion where to find his relations."

Mrs. Spriggs, who years before, on her husband's enlistment, had adopted his latest and most innocent alias, rose with alacrity, and bidding the girl mind the shop led the way into a poky back-parlour. Moving a strip of carpet she opened a trap-door and motioned Zincraft to descend.

"Now, sir, what of Alf? Has the boy come to any harm?" she asked, with a shake in her voice, as she followed him into a large, gas-lit cellar.

"Not that I know of, as yet; but he is in a fair way to do so unless he is warned immediately on his arrival from India," replied Zincraft. And he proceeded to pitch the tale which he had concocted whether Lindsay Cathcart or Alf was returning successful. The beauty of the story lay in its simplicity, and in the fact that if the young crackman had confided the purpose of his Eastern journey to his mother, it would tally with her information.

It had come to his knowledge, he said, that two men, whose names for the sake of his own safety he dared not mention, had formed a plan to waylay Alf at the first chance after his landing and rob him of a valuable jewel which he had gone out to secure. It had struck him, Zincraft, as such a mean thing for men in the same line of business to plan against a brother professional that he decided to thwart them. The best way of doing this seemed to be to inform Alf's relations, as he was not sufficiently on terms with the returning traveller to be able to approach him on such delicate ground.

"He would probably take me for a police-spy, and of course I could not put him under the protection of the police, not knowing how he had come by the diamond," concluded the doctor, with a benevolent smile.

"It belonged to his father—a brave soldier of the Queen," said Mrs. Spriggs virtuously. "I shouldn't wonder if his old dad wouldn't turn up alive and hearty along with him. But that don't alter my gratitude to you, sir, for there's reasons, as you doubtless you are aware of, why we can't make free with the police," she added.

Zincraft cast a sly smile round the underground room. The "reasons," or some of them, were apparent in sundry silver candlesticks and pieces of plate; for Mrs. Spriggs, as a notorious "fence," was unable to adopt the usual tradesmanlike method of putting her best goods in the window.

"Then I am so happy to have done the right thing," he said cheerfully; "and having done it, nothing remains but for me to bid you good-day."

He took up his hat and made a show of departure, but, as he had expected, Mrs. Spriggs had not done with him yet. First she wanted him to have a drop of "something short," which he refused with Spartan self-denial, and then she asked him how she had best pass on to Alf the warning which he had conveyed to her.

"Why, by meeting him at Dover and telling him to watch himself if he has got the diamond on him," was the reply, uttered as though no other suggestion were possible.

But there was an insuperable objection to this course. Mrs. Spriggs assured her visitor. Not only was she too short of breath to make her meeting Alf a certainty among a crowd of passengers, but she couldn't, as things were, leave her shop just at present.

"There's that Trevor and Godbold on the prowl," she said, trying to close one fat eyelid. "It takes a close woman to stall off the likes of them."

This was a facer for Zincraft, who had hoped that the fond mother and no one else would undertake the duty he had prepared for her.

"How about the young lady in the shop?" he said tentatively; "she is our Flash friend's sister, I presume?"

"No; she's his gal," replied Mrs. Spriggs, with a cautious look at the trap-door. "She's a fair scorcher in some ways, but a real good sort. Used to dance a breakdown in a pub at Wapping, and when she fell sick, the brute who kept the place turned her out of doors. Alf brought her home to me, and she's helped in the wardrobe shop since. There ain't anything she wouldn't do for us."

"Well, why not let her go and meet the boat at Dover?" suggested Zincraft.

For answer Mrs. Spriggs ascended to the trap and called down her prospective daughter-in-law, for whose benefit Zincraft repeated his tale. The little doctor's face seemed to have a weird fascination for the fate of Gussie, to judge by the critical air with which she watched his watery eyes and mobile lips, though as soon as she understood what was required of her the issue was never in doubt. "Don't make any mistake," she

said at the finish. "I'll go down and post the boy up to rights. No one shan't mess him about whilst I'm in charge." And at a sign from Alf's mother she returned to her post above, still with her large hollow eyes searching Zincraft's countenance and without a word of thanks for his apparently disinterested services. So marked was the omission that Zincraft alluded to it playfully as he again prepared to depart.

"Well, she ain't exactly in the swim with us," replied Mrs. Spriggs, with a meaning glance at the shelves of doubtfully-acquired plate. "She is on the straight, she is, and she never adackly approved of this yere diamond jaunt, thinking as it was on the crook. Nothing as I could say would make her believe the fool belonged to his old dad. And there's another thing," added Mrs. Spriggs with hesitation.

"May I inquire?" said Zincraft gently.

"She's took a kind of dislike to you," replied Mrs. Spriggs, "ever since she saw you here in the lane one night, aiding and abetting a young chap that was gammoning a gal out of a cab into a close carriage you was in. I wasn't best pleased with the job myself at the time, but, Lor' bless me! I know now you wouldn't hurt a baby."

"Why, the young lady was the gentleman's sister," Zincraft replied, with an effort of memory connecting the accusation with Kate's capture. That incident, as one of a long series of similar ones, had made no particular impression on him.

"Then what she spoke was true, and I ought to have known it all along," cried Mrs. Spriggs with enthusiasm. "Gussie'll tell it that way too—now as you've told the same tale as the gal in the carriage."

"And there's one other thing," purred Zincraft, edging off to the foot of the ladder. "I shall be curious to hear whether I have been of real use to you. If your son's sweetheart will telegraph to me at this address in Villiers Street the one word 'Right,' I shall be immensely relieved. It will mean that Alf has got the diamond safe and sound and has been duly warned. On the other hand, if he has not got it, I shall be equally reassured by the word 'Endeavour,' because you see in that case this wicked attempt on him is not likely to be made by these well-posted rascals."

The mother's heart of Mrs. Spriggs softened towards this solicitous friend in need, and she promised that the telegrams should be sent. But her prediction as to Miss Gussie's whole-souled reception of Zincraft's statements was not altogether verified. When the doctor had made an unctuous exit Gussie shook her touzled but wise young head at the good lady's eulogies on their informant.

"There was more in that faked cab haccident than meets the eye," she unconsciously quoted. "Same as there is in this yere diamond bizness, too, to my thinking. Anyways I shall go to Dover."

CHAPTER XVIII.

The Diamond Homeward Bound

The jungle, vast and well-nigh impenetrable, had swarmed up a mass of Alf and his erswain servant, Lunkman, as completely as if the training forest branches had been the hands of some unseen wood-demon which had snatched them from the middle of the cavalcade.

The dismounted troopers leaving two of their number with the horses, plunged into the clogging undergrowth and made their way in the direction of the crackling sound which had followed the flight of the fugitives. With them went the Inspector and Lindsay Cathcart, the latter sick at heart at the frustration of his hopes in the very hour of success. Suddenly there was a cry from one of the troopers, and fighting through the thorn brakes to the spot they found his stooping over a prone figure.

The police-officer struck a wax vesta and flashed it over the wily Lunkman, lying face upwards and senseless from a blow that had smashed the bridge of his nose.

"The white rascal has soon shunted his brown confederate," said the Inspector. "This simplifies the job, though. Only one to look for, and that one certain to have the plunder."

For a search of Lunkman's scanty raiment quickly showed that the diamond was not on him, and, when he had been despatched on the back of a stalwart trooper to the highway, the party deployed again. Always avoiding the village, which after his narrow escape was the last place where they would be likely to find him, they hunted the jungle high and low, but of him who was known to them as Mr. William Dowsett they discovered no trace.

INTERESTING FACTS

There are eight large cities in Australia.

The skins of animals were the earliest forms of money.

It is impossible to run at an altitude of 17,000 feet above the sea.

So far this year Superior, Wis., has had more divorces than marriages.

If kept continuously running a watch will tick 160,144,000 times in a year.

Great Britain has a longer sea coast than any other country in Europe.

The smallest cows in the world are to be found in the Samoan islands.

There are houses still standing in Nuremberg, Bavaria, that were built in the year 1080.

On the west and southwest coasts of Korea the tide rises and falls from 26 to 38 feet.

It is said that an organized system of charity prevailed among the Egyptians 2500 years B.C.

The first three-story building in Hongkong was erected and owned by a professional beggar.

If the sun was to be divided into smaller planets it would make 1310 each of the size of the earth.

Approximately 35,000 adult Chinese were converted to the Roman Catholic faith in China last year.

Matter weighing one pound on the moon's surface if transferred to the earth would weigh six pounds.

The debris left from the coral made into jewelry and ornaments is crushed, scented, and sold as a tooth powder at a high price by the Italian perfumers.

An engineer declares that 50,000 people now do the work, with the aid of machinery, which needed 16,000,000 persons to do a generation or so ago.

The beautiful colors seen in the soap bubble arise from the fact that the bubble, being very thin, reflects light from both the outer and inner surfaces of the film.

The gold contained in the medals, vessels, chains and other objects preserved in the Vatican would make more gold coin than the whole of the present European circulation.

The meanest burglar on record has been discovered. He broke into a baker's shop, and, finding only some small change as plunder, took a single bite of every pie and cake in the place, thus rendering them unsaleable.

King Alfonso of Spain, the most expensively dressed monarch, has 150 suits in his wardrobe, and never wears one more than half a dozen times. His tailor bill is approximately \$7,500 yearly, during which time he usually buys about 100 suits.

Artificial scarecrows are of little if any value in Egypt. The owners of the cornfields near the Nile have to employ natives, who stand on raised platforms and throw stones to scare away the voracious birds, which would otherwise quickly devour the entire crop.

One of the potentates of India has had made partly of silver, with large female figures of the same metal in each corner, each figure holding a beautiful fan. The weight of the sleeper's body starts machinery which makes the figures wave the fans gently, thus causing a pleasant breeze.

Bavarian engineers are building a tunnel under the Alps to divert part of the Isar river into the Walchen lake for an enormous hydro-electric plant. When completed the work, which is well under way, will furnish enough electrical power for all the Bavarian railways, industrial plants and city lights.

Abyssinia has a population of 12,000,000 inhabitants, of which number fewer than 3,500,000 are Ethiopians. The country is dotted with churches, monasteries and convents, the former being, for the most part, small and unpretentious, usually built in circular form and surrounded by a cross to which ostrich eggs are attached.

BOY SCOUTS

The Troop meeting was held yesterday evening at 7 o'clock, because of the lacrosse game tonight.

The patrols have been re-organized, the order now being:

Eagles:—V. Pohl, P.L.; D. McDonald, Second; B. Ward, A. Miller, H. Rankin, T. Matheson, P. Campbell.

Rams:—G. Bowcott, P.L.; N. Armstrong, Second; S. Hill, E. Knight, L. Crossley, C. McKenzie.

Beavers:—R. Brethour, P.L.; G. Davis, Second; E. Livhouse, G. Douglas, J. Livingston.

The boys who are able to go to camp Tuesday 17, next, will please give in their names by Saturday.

V. GODDARD,
Scout Master.

Test for Second Class Scout

1. Have at least one month's service as a Tenderfoot Scout.

2. Have a knowledge gained by practice of elementary first aid and bandaging covering the following:

(a) Triangular bandage, (b) Fastening the bandage, (c) To make a large arm sling, (d) Fractured arm bone, (e) To carry a patient, (f) Fracture of the forearm, (g) Fractured jaw, (h) Fractured collar bone, (i) Fracture of the leg, (j) Arterial bleeding.

3. Know the Semaphore (or Morse) sign for every letter in the alphabet and for the numerals. Must send and receive a simple message.

4. Follow a trail for half a mile in twenty-five minutes.

5. Go a mile in twelve minutes at "Scout's Pace." A margin of thirty seconds each way is permitted. This is not an athletic feat but a test for judging distance by time.

6. Lay and light a wood fire in the open, using not more than two matches. No paper or birch bark to be used.

7. Cook a potato of a pound of meat and two potatoes without cooking utensils, other than the regulation billy, or its equivalent, in the open over camp fire if possible. N.B.—or without any utensils.

8. Know the sixteen principal points of the compass.

AIMS OF SCOUT MOVEMENT.

The aims of the Scout movement are to develop—

1. Character and intelligence.
2. Health and strength.
3. Skill and handicraft.
4. Service for others.

The Scout Law.

1. A Scout's honor is to be trusted.
2. A Scout is loyal to God and the King, and his officers, to his parents, his country, and his employers or employees.
3. A Scout's duty is to be useful and help others.
4. A Scout is a friend to all, and a brother to every other Scout.
5. A Scout is courteous.
6. A Scout is a friend to animals.
7. A Scout obeys orders of his parents, Patrol leader or Scout Master, without question.
8. A Scout smiles and whistles under all difficulties.
9. A Scout is thrifty.
10. A Scout is clean in thought, word and deed.

Tenderfoot Scout Test

The limits of age for enrollment are 12 to 18 years inclusive. He must satisfy his Scoutmaster that he knows:

- (1) Scout law and promise.
- (2) Signs and salute.
- (3) Composition of the Union Jack and the right way to fly it.
- (4) Uses of the Scout staff.
- (5) Tie the following knots, and know the special use of each: Reef, sheet bend, clove hitch, bowline, fisherman's, sheepshank.

He will then make the promise before the whole Troop, and will be entitled to wear the Scout badge and uniform.

The Scout Obligation.

"On my honor, I promise to do my best:
To do my duty to God and the King,
To help other people at all times,
To obey the Scout law."

It's in The Review—the news of the District.

EGZEMIA You are not alone in your skin trouble. When you use Dr. Chase's Ointment for Eczema and Skin Irritation, it relieves at once and gradually cures the trouble. Dr. Chase's Ointment free if you mention this paper and send 25c stamp for postage. See a list of all dealers or Edmondson, Hales & Co., Limited, Toronto.

WORTH REMEMBERING

PREVENTS RUST

Leave the doors open after using the oven so that the warm air may evaporate and no moisture will collect to cause rust.

SOIL ON THE RAINCOAT

When the raincoat becomes spotted or splashed with mud, a raw potato cut in half and rubbed well on the spots will remove them quite readily.

KEEPS THEM JUICY

When pan-boiling steaks or chops, be careful to pick them up by the fat when turning. A fork stuck into the meat will let the juices out.

TO SOFTEN A SPONGE

Do not throw out the sponge that has become hardened from disuse. Cover it with cold water, and a teaspoonful of borax and boil for one minute in a clean saucepan. Remove the sponge and rub dry borax into it, rinse in cold water and it will be as soft as when purchased.

THEY WILL WASH

Don't be afraid of washing your chintz and cretonne covering and draperies. Wash them in warm water in which the soap has already been dissolved and they will not run. Rinse thoroughly in water of the same temperature.

AN ACCURATE LIST

Be certain to keep an accurate list of the things sent to the laundry. Then when anything is lost or torn you are certain of your claim and a reliable laundry is always ready to make good in the case of regular customers.

DURING ILLNESS

Should hot cloths be required to relieve pain, it is well to put them in the upper part of a steamer with the water boiling underneath. They can then be kept ready without the trouble of wringing them out.

HOUSEWIVES' IDEAS

Some housewives say that a pinch of salt will improve any dish.

Turn the soiled window shades upside down and you will double their lives.

Damp tea leaves sprinkled over the carpet before sweeping will prevent the dust from flying all over the furniture.

BUTTONHOLES ON SHEER MATERIALS

Try rubbing a little library paste on the wrong side of thin materials and letting it dry before cutting the buttonholes. It will give you a firm surface for sewing.

MAKES MORE

If the cream does not whip to the amount you expected, beat the white of an egg until stiff, add powdered sugar and a little vanilla and add this to the whipped cream. You will not know the difference.

TEA AND STARCH

Some tea mixed with the starch when starching black or brown materials will insure against the starch showing. The strength of the tea should depend upon the color of the material, the darker the garment the stronger the tea.

CLEANING PAINTED WALLS

Dampen a soft cloth in warm water, rub on the cloth a small quantity of baking soda, wash a small part of the wall with this, rinse with clean warm water and wipe dry. Walls cleaned in this way look as if freshly painted.

VEGETABLES BALANCE DIET

Remember that the science of dietetics now teaches that green vegetables are fully as important in a "building up" diet as are the so-called "strength foods." The days when "plenty of milk and eggs and meat" told the whole story are gone forever.

MARKS FROM ROCKERS

If you have a rocking-chair in your home that is always occupied by a person who rocks incessantly, and causes ugly marks on your varnished floor, turn the rocker upside down some night and apply a strip of felt to the underside of the rocker by means of a little glue. It will dry by morning, and your worry will be over and no one the wiser.

A CLEAN CUT

Wet the knife blade with water before cutting a pie with meringue on it, and you will have a good, clean cut.

If you have any old magazines, why not hand them into the Sidney Library. Many other people would probably be glad to read them.

The Review Job Printing Dept.

We are in a position to handle job work in a satisfactory manner, and will appreciate any orders received. The Review plant is well equipped in every way, being the largest and most up-to-date of any found in a town the size of Sidney. We have added considerable equipment to the Review plant during the past year or so in order to be in a position to successfully handle anything that may be placed in our hands in the commercial job printing line. The Review has had splendid support in this direction, and this fact is very much appreciated. If at any time our customers are not satisfied we hope they will tell us so, and we will endeavor to make it right. We go on the principle that only the very best work is wanted by our many customers, and we endeavor to give them what they want. To those who have printing to be done, we ask them to give us a chance to do it. We feel sure that our prices will be found reasonable, consistent with good workmanship.

VICTORIA, B. C.

Local and Personal

Mr. Bert Matthews, of Blain, U.S.A., is visiting Mr. and Mrs. McKillican.

Mr. and Mrs. E. Davey and baby daughter, were visitors to Sidney, Tuesday.

The last bucket of cement on the new road was laid at 3.30 p.m. Wednesday afternoon.

Mrs. Partington, of Vancouver, is spending a few days with Mr. and Mrs. Ramsay.

Rev. Mr. and Mrs. McNaughton of Wadena, Sask., are visiting Mrs. Kayle at Deep Cove.

Mr. S. K. Halsey wishes to announce that the Auditorium will be closed for two months.

Word has been received that the Dominion Government has taken over the control of the Ferry Wharf.

Dr. Di Cav Castri, Mr. H. Pout and Miss May Pout, of Victoria, were visiting friends in Sidney yesterday.

Mr. G. E. Goddard, and son, Everett, left for Courtnay Wednesday morning, on a business trip, for two or three days.

Mr. G. A. H. Baxter, traffic superintendent of the B. C. Telephone Co., Vancouver, was in Sidney on business yesterday.

Miss Margaret Simister has returned home from Rowe Lake, B.C., where she has been teaching a school during the last year.

The Senior branch of St. Andrew's W.A. will meet on Wednesday afternoon at 3 o'clock at the home of Mrs. (Dr.) Manning.

Mr. William Dee, Government Telegraph Superintendent of Victoria, was in Sidney and Islands on business yesterday.

Miss E. Bridger is returning to her home in Winnipeg, after having spent her holidays as the guest of Mrs. C. Peck, at Roberts Bay.

Mr. John H. A. Matthews, who has been visiting his parents, Mr. and Mrs. J. Matthews, Third St., left Wednesday for Seattle.

Mrs. A. Young, of Quebec City, is paying a short visit to Mr. and Mrs. R. N. MacAulay, of the East Road and Broad's Cross Road.

The friends of Mr. J. Johns, of Schools Cross Road, will be sorry to hear of his illness. He was taken to a hospital in Victoria.

It is proposed to hold a "Bee" on Thursday evening of next week at the Ferry Wharf, to raise the Arch and drive-way. Everybody invited.

Miss Margaret, and Mr. Charles Cochran, are spending their summer vacation with their grandmother, Mrs. W. C. Anderson, Annapolis Royal, N.S.

A lacrosse match will be held on Thursday evening between Sidney and Esquimalt. This is a game well worth seeing. Everybody turn out and boost the home team.

Mr. Everett Goddard having sold his Garage business, known as the Sidney Service Station, to Mr. B. McKenzle, trusts that the patronage extended to him will be given to Mr. McKenzle.

Mr. and Mrs. S. L. Rickotts and son, Alfred, have removed to Victoria, where they will reside. It is rumored that Mr. J. Gillman, the Sidney barber, will occupy their property on the Broad's Cross Road.

Mr. M. B. Jackson, K.C., M.P.P., returned today from Winnipeg, where he has been attending a conference of the provincial game boards, with regard to the preservation and regulation of game and fur.

Mr. and Mrs. S. Gregory and infant, have taken up their residence on the East Road, Sidney. They formerly resided at Ganges, Salt Spring Island, on the Rev. George Dean's ranch. Mr. Gregory will be employed at the Sidney Mills.

Richard Shiner, the young lad, who met with such a serious accident last week by being knocked down with an auto, is doing well at Rest Haven and is on the way to recovery, although it will be some time before he fully recovers.

Hugh McLeod, Dominion Secretaries, accompanied by local officials of the Grand Army of United Veterans, accompanied by Victoria officials of the Association, paid a visit to the Sidney branch yesterday before leaving for Vancouver.

The Misses Anna and Nellie Rattray, of Prince Albert, Sask., are the guests of Mr. and Mrs. Walter Wakefield for a short visit, having broken their journey on the way to Los Angeles. They expect to resume their journey on Sunday, July 22.

The beach at Bazan Bay is being patronized by autoists from Victoria and vicinity, especially on Sundays. About six cars of picnickers spent last Sunday on various parts of the beach. This is one of the finest beaches in the vicinity and is not spoiled by being too popular.

Mr. A. P. Lesueur, of Bazan Bay Road, recently paid a flying visit to his home, from Stewart, where he is developing some mining property. He reports the situation in Stewart as very good. A great many Eastern capitalists and engineers are examining properties there, with a view to investments.

All those who have examined the new paved road are loud in their praise in the way it is laid out, especially with regard to the curves and grades, special thanks being given for the improvements being made at the crossings at Tripp siding on the B.C.E. and C.N.R., also at Raey's bridge.

On Friday, July 6th, Mr. J. Ramsay invited his class to a picnic to Point Island. The party made the trip in Captain Peterson's launch, leaving at 10.00 a.m. and returning at 6.00 p.m. Mrs. Ramsay, Mrs. Knight and Mrs. Timlick accompanied and assisted the party with the tea arrangements. Good weather added to the pleasure of the picnic.

Gordon McLeod returned to his home here from New Westminster, for the summer vacation. He unfortunately broke his arm, which hindered him taking his exams. Mr. Willis, superintendent of education, has passed him through on his class records and upon recommendation of his principal, Mr. Shields, and his teacher, Miss Newby, at the Central, New Westminster.

North Saanich seems to have taken a new lease of life in the land settlement line. Quite a number of people have been inquiring about houses and land the past few weeks. Mr. Stephen Jones, of the Dominion Hotel, Victoria, has bought about fifty acres, and will in the near future clear it and erect a home. Other people are looking for places smaller than the above, but all with the intention of building homes.

On Sunday last Mrs. Knight invited a party of friends to a picnic at Fulford Harbor. The party left Sidney in Captain Peterson's launch at noon, arriving at Fulford about 1.30. Lunch and tea were served on the beach. Mrs. Eaton, of Fulford kindly supplied the tea. The return trip was made in the cool of the evening, which was a very delightful ending to a most enjoyable day. Those present were: Mr. and Mrs. R. Morris, Mr. and Mrs. Timlick, Mrs. Knight, Mrs. Blackman, Mrs. Alice Corfield, Miss Ruth McCulloch and Miss Ella B. Blackburn.

NOTES BY THE WAY

By "Observer"

British Columbia seems to be getting a great deal of notoriety these days from what a friend styled the modern outdoor and indoor sports of the present day, viz.: bootlegging and obtaining divorces. The B. C. daily papers have their news columns filled with news of bootlegging, etc., and of divorces obtained. B. C. easily lead last year in the number of divorces obtained in Canada, nearly one-half of those obtained coming from B. C.

Now that summer has arrived, everywhere you go you can smell "Preserves." The berry season is now here, and the busy housewife is up to her eyes in canning, preserving or jamming strawberries, as their fancy dictates. Cook books are being brought out, and the neighbors are being quizzed about their favorite recipes. Well, the end justifies the means, and during the coming fall and winter, when fresh berries are not available, the canned or preserved ones are very necessary.

The building boom seems to have left Sidney in the lurch. Speaking to a resident of the Bazan Bay section of the peninsular the other day, I was told that during the past three or four years some twenty-five dwellings had been erected in that vicinity. What would happen if Sidney had as many dwellings erected during that period. We want more habitable dwellings, and there are lots of demands for modern dwellings on the peninsular, and Sidney might as well have more inhabitants as any other section of North Saanich. What is the reason?

A great deal of damage has been caused throughout North Saanich lately by "Coons." These small animals seem to have a great liking for chicken and young turkeys. They are among the fur bearing animals "protected" by law, and many chicken raisers wish there was not so much protection, as their ravages cause a great loss. A peculiarity about these little creatures is that they will eat only their own kill, and then only after washing it in water. They also cause a great deal of destruction among game and song birds, robbing their nests of eggs and young birds.

The presence a short time ago of a "detachment" is that the right word? of Girl Guides from Uncle Sam's domain should go a great ways in building up the Girl Guides in Sidney. Why not have some "hikes" during the summer? Try a few short ones at first, to learn to walk, say to Mount Newton, Deep Cove, Patricia Bay, Swartz Bay, and many other spots in the neighborhood. Thus learning the geography of the neighborhood. It might also be used to build up the habit of observation, by having all the Guides write an essay on what they saw after each hike, thus building up their powers of observations, as well as their powers of descriptive writing.

We see a great deal in the newspapers these days about immigration of young people, principally orphans from Great Britain to this country. This is a great benefit to this country of ours, but would not be a greater benefit to us to empty our own orphan asylums and homes and have the inmates either adopted by our own people or else placed in homes in the country under government supervision, where they would be brought up and settled on the land. We have too many institutions of this kind where the managing committees seem to take great pleasure in bragging about the large number of inmates, and telling about the great work they are doing among them, but making no efforts to have them placed in good homes, but would rather have them remain inmates of the homes.

The attention of many of our people have been called to the practice that has arisen in the smaller communities in B. C., of giving money prizes to small children taking part in sports, etc. This practice, to say the least, is demoralizing. Children's sports, as well as those of more mature years, should in all cases, be run for the sport of winning, not for the prize offered. This easily leads to commercialism in sport, and the writer, after the sports at the Saanich Fair, last fall, was very much dismayed to hear the children brag, not of the races or contests they had won, but of the money they had made. This should not be. It may be easier to give money prizes, but, especially in the case of children, it is a demoralizing practice. It is to be hoped that we will hear less of this at any sports held in the future in Sidney.

The Bella Coola Indians have a tradition of a great flood which is borne out by traditions attached to a mask now in the Provincial Museum, purchased from Chief Schooner during the year 1917. The tradition is as follows: "In far distant days Schooner's ancestors lived in a large chief's house in the sky. The first of them of whom there is still any tradition was named Tamaltzen. This man when he danced used two masks, the eagle and the killer-whale. These were obtained by him at an old village named Nuskelste, a place halfway up the river Teintz, which runs past Bella Coola. Of this place it is said that at one time the sea rose so high that it filled up all the streams and reached the top of the mountains to the west of Bella Coola, driving out all the natives from their houses until they could climb no higher. Just in time to save them from extermination a huge killer-whale swam up to their last place of refuge on the mountain tops and most of the people were able to climb inside and so were saved. The whale was as large as a big house and here all were cared for until the waters subsided. When land was seen once more the raven flew up and down croaking joyfully that so many people had escaped from drowning." Thus the Bella Coola Indians' version of the flood

If the alfalfa is cut before these small shoots start at all the second growth will be slow in starting and will, as a result, take considerably longer to make a second cut than when the first crop is cut just as these new shoots appear in the crowns. If, on the other hand, these shoots have started and made sufficient growth to be cut off by the mower, the second cut will be even more delayed. The proper time to cut, therefore, is just when the shoots of new growth are first noticeable at the crowns.

The length of time the hay should be left in the swath will depend both on the heaviness of the crop and the weather at cutting time. Care should be taken, however, to rake the hay into windrows while it is still a little tough, so that the largest possible percentage of the leaves will remain on the plants, as these are by far the most nutritious part of the hay. After curing slightly more in the windrows the hay should be put up in coils that are small in diameter in proportion to their height. This permits the hay to cure much more quickly than if put in large bulky coils, as the air can get through them better and there will be less danger of moulding.

Occasionally it will be possible to haul the hay direct from the windrow to the barn or stack, or, in stacking in very dry climates, direct from the swath to small stacks; but over a large portion of the country sufficient improvement in quality will be obtained by coiling to justify the expense.

Sufficient time should elapse in the coil to allow the hay to cure thoroughly, particularly if a large quantity is to be put into one mow in the barn. Otherwise, there is serious danger of the hay heating considerably in the mow and damaging the feeding value of it, as this heating almost invariably results in a dusty, rather unpalatable hay which is injurious to stock, particularly horses.

MAKING HAIR NETS IN CHINA

Hair net exports, one of China's chief industries, have shown a vast increase over last year. This market, which was nearly ruined by the bobbed hair fad, decreased over 37 per cent. during 1922.

ADVERTISING PAYS

The merchant who does not advertise is as far behind the times as the old-time stage coach. He plods along in the same old way, year after year, while the more progressive merchant places his wares before the public and increases his business year by year. Persistent advertising has made millions for many progressive merchants, who recognized the value of advertising from the first day they commenced business. The Review goes into almost every home in the district and is the proper medium for reaching the people.
